

Updates for Program for Visually Impaired Adults at VCC

Our program currently has about 35 students, including those taking basic level courses and those working on the Office Administration Certificate. Due to popular demand, we have resumed evening classes. We currently have a class Wednesday evenings, for students who work or prefer evening classes. Since the transition to WorkBC from other employment agencies, we are not receiving as many referrals. We are looking for other means of getting our program known in the community.

Rita Dilek became Head of the program in January 2013.

Betty Nobel is planning to retire March 2014.
